Subject: Spinach, Arugula and Spring Mix Issues

During the last two weeks we have experienced short supplies with Spinach and Arugula. Unfortunately this shortage will continue for at least the next two weeks. Cold weather and light yields are causing this shortage.

We are being advised by our production department that now Spring Mix is going to be tight this week.

We have purchased expensive raw product to help full fill orders to the best of our ability. This increase in raw product costs is forcing us to increase prices. However, we will honor pricing on all written contracts.

Please check with your Church Brothers sales representative for daily pricing changes.

We apologize for the pro rates and any inconvenience this has caused you and your customers. Our sales representatives will keep you informed of any changes that occur.
